

## **"Enabling Access and Opportunities with Hybrid Learning"**

The Workshop titled "Enabling Access and Opportunities with Hybrid Learning" will bring forward the opportunity for all sections of the society to access education through e-learning. The facility of Hybrid Learning will provide a chance for a large percentage of Persons with Disabilities in the country to have access to education. The eminent speakers in the session will cover aspects from the Industry, Standards, Academia and Not for profit organisations working for the disabled people.

The National Education Policy 2020 is a forward looking policy document for the Education sector in India which was announced recently and has referred to the Rights of People with Disabilities Act, 2016. Hope the policy brings out new transformation in the Education sector for the PwDs. It has been identified from various sources that recently the PwD had faced a lot of challenges during the pandemic in accessing E-education or have got no access to the internet. Such issues need immediate remedial actions and should be considered as a high priority by the government. Hence, IIGF as platform will be a great facilitator to discuss such current issues and grievances related to children accessing to basic education in the country and given that the issues are dominant among the PwDs today, this session will bring forward the recommendations to the Education sector to put forward various prominent issues to the policy makers.
